Kohala Items. FROM OUR OWN CORRESPONDENT. Judge Johnson is looking remarkably happy of late. The cause is a big girl baby. We congratulate the Judge and hope he will bring the little one up according to law. Mr. Hattie "went and did it" last week by mar-

rying Miss Sniffen, a half white of remarkable Honoiulu amiability of manner and disposition, and a good house keeper besides. Happy Hattie and happy Our old friemd Renton proposes a trip to the East, and if rumor is correct will leave this mail. We shall miss his genial good-natured presence. but as it will do him good we will stand the tem-

porary loss like men. We met the Dr. a day or two since and found him quite pleased with the passage of the Hospital Bill, as he says district hospitals will do more to save the race and give them more faith in good medical treatment and care than anything that could be done. He thinks a very respectable number of so-called lepers can be cured if under com-

plete control such a hospital would ensure.

Quite a wholesale arrest of Sabbath breakers at the Halawa mill last Sunday. Teams and men were quite busy cutting and gathering feed for stock when our alert, and by far best policeman Julian, pounced upon them, creating, as we are told, a great deal of harmless effervescence at head quarters, from whence reinforcements were immediately despatched, to be again routed by a pious policeman from Pololu. Judge Johnson found them all guilty. An appeal was taken out, but as it is a clear case we don't see why more costs are to be made unless some one has lots of money to spend. Another happy dad is Mr. Bolter, who being determined not to be outdone by the Magistrate, was presented with a fine boy a few days since.

THE ladies of the congregation of St. Andrew's Cathedral held a meeting on Wednesday afternoon. at which it was resolved to form a St. Andrew's Sewing Society, the subscriptions and work to go it aid of the building fund of the Cathedral. rangements were also made for reorganizing the Sunday school and a number of young ladies have volunteered to become teachers.

AT monthly meeting of the Young Men's Christian Association held on Thursday evening in the Lyceum, the attendance was very small, owing chiefly to the fact that many of the active members of the Association were engaged at the meeting at Kaumakapili Church. Before the minutes of the previous meetings were read, the secretary evening at the same time and place, in order that a larger attendance might be secured. This motion was carried, but at the request of several of those present the secretary read the report of the Building Committee, which should have been the special matter for consideration at this meeting. This showed that after cutting down the cost of the proposed building as far as possible without altering its general features, it appeared that \$14,700 was the least sum for which it could be erected in substantial materials. An estimate of its cost if erected in wood had been made at \$12,000, and the committee considered that the difference did not warrant a departure from the meeting would devise the means to secure the balance required. Mr. Cooke, the only member of had been made, and said that he felt sanguine that if a determined effort were made the requisite money could be raised.

THE general meeting of the Honolulu Athletic Association, held on Tuesdy night at the Hawaiian Hotel, was fairly attended, about 40 ladies and

The minutes of the first general meeting of the society, held in February, were read and approved, and those of an informal meeting held in May, when the quarterly meeting lapsed for want of a quorum, were also read, and ordered to stand as part of the records of the Association. Mr. Webb then read a resolution passed by the directors, to the effect that the members be called together and asked to raise at least \$1,000. in order that the erection of a gymnasium may be proceeded with. It was at first proposed to levy an assessment of \$10 each on the members of the Association, but after discussion it was resolved to open a subscription list, and instruct the directors to interview each member of the Association personally with the purpose of raising \$1,000 or more. At the suggestion of the acting secretary, the subscription list was started in the room. It was headed by Mrs. H. A. P. Carter, with a life memniary assistance towards an institution of so much value to the youth of Honolulu. The next meeting of the Association will, in accordance with the

rules, be held during the first week of next month. PERILS OF THE DEEP .- The Chicago, Ill. (U.S.A. inter-Ocean, in a late issue, contained an interesting item which we give herewith: "The world enowned swimmer, Captain Paul Boyton, in an interview with a newspaper correspondent at the seashore, related the following incidents in his experience;—Reporter—"Captain Boyton, you must have seen a large part of the world?" Captain Boyton—"Yes sir, by the aid of my Rubber Life-Saving Dress, I have traveled over ten thousand miles on the rivers of America and Europe; have also been presented to the crowned heads of England, France, Germany, Austria, Belgium, Italy, Spain and Portugal, and have in my possession forty-two medals and decorations; I have three times received the order of knighthood, and have been elected honorary member of committees, clubs and societies." Reporter—"Were your various trips accompanied by danger?" Captain Boyton- That depends upon what you may call dangerous. During my trip down the river Tagus, in Spain I had to shoot one hundred and two waterfalls, the highest being about eightyfive feet, and innumerable rapids. Crossing the Straits of Messina, I had three ribs broken in a fight with sharks; and coming down the Somane, a river in France, I received a charge of shot from an | tening to the arguments of Ministers and of excited and startled huntsman. Although all this was not very pleasant, and might be termed dan-gerous, I fear nothing more on my trip than in-tense cold; for, as my limbs are free and easy, and not cramped or benumbed, I am all right. Of late carry a stock of St. Jacobs Oil in my little boatthe captain calls it Baby Mine, and has stored therein single rockets, thermometer, compass, provisions, etc.)—and I have but little trouble. Be fore starting out I rub myself thoroughly with the article, and its action on the muscles is wonderful. From constant exposure I am somewhat subject to rheumatic pains, and nothing would ever benefit me, until I got hold of this Great German Remedy. Why, on my travels I have met people who had been suffering with rheumatism for years; by my advice they tried the Oil, and it cured them. would sooner do without food for days than be without this remedy for one hour. In fact I would not attempt a trip without it."

People of every nation and soil are cured of their ills by St. Jacobs Oil.

A New Industry.

Mesars, Bolles and Co. sent to us some samples of sliced pineapple, put up in tin by Messrs. Ackerman and Muller, of North Kona, Hawaii. The fruit thus prepared we found to be of excel-lent flavor, and the slices were firm and of a good ent flavor, and the slices were firm and of a good will need to proceed with care. The design is very neat, compactness having evidently been the artists chief aim. No less than seven different kinds of marble have been called into a heavy cargo including about 1,200 tons of sugar and a full passenger list. By some change in the arrangements of the ship additional state rooms their combined effect is very good. MR. They have written about it, and it is coming-no mistake. What an honor for old Blank! It only required the hoisting of some fiags, and a meeting at the Babel to oust old Moreno, but it seems to need a a whole gun-boat and a paid agent besides in Washington, to fire out old Blank, I don't think the party have powder enough to blow him out. It may require the "political earthquake" to do the business which however may engulf the party as before, when Adams & Co, tried it on, and engulfed themselves and left old Blank smiling

[COMMUNICATED.] The political canard, or false rumor of public original idea of building in brick. The subscrip- events, is said to have been the invention of a tions promised amounted, after paying for the great French politician. It is the constant depractised in this community. The usual pur-

pose is to create unrest and apprehension. Rumor doth double, like the voice and echo, The number of the fear'd.' For instance: It is said that the ministry is divided; that His Ex. so-and-so will not stand

so-and-so; that Mr. Blank is going to England

or Japan; that the ministry are at loggerheads on the loan bill; that the lepers are all to be returned to their homes; that there is to be a sweeping dismissal of officers, especially of Americans; that America won't stand this; that Blank & Blank of the "Beach" have written for a man-of-war; that their agent Blank, who went by Blank & Blank of the Barry that the inevitable America. Same will come to stay; that the arch agitator who has divided

and conquered, and who has "succeeded in widening the breach between native and foreigner. and like Rhodes' ancient Colossus, stands a brazen image as it were, with a foot upon the neck of each," must be "fired out;" are all rumors manufactured by the political spite of people who try to rule or ruin. But sometimes political spite and false rumor prove to be the most stupid of political blundering. It serves more than it disserves the object of attack. Men can grow officially fat on abuse. There are several eminent examples before the world of this fact, and probably Hawaii may furnish an illus-

EDITORIAL ARTICLES.

(From the Daily Pacific Commercial Advertiser,) VERY satisfactory news has been received. from Washington in regard to the prospects of the Reciprocity Treaty. It is said now to be manifest that such strength as the opposition to Island interests possesses is confined to the House of Representatives. There is good assurances that the Senate recognizes the political importance of the Islands, and will not allow the commercial question to affect the good relations betwen the United States and Hawaii. It is a topic of general remark at Washington that the opening of the Panama Canal will make Honolulu the most important port of call in, perhaps, the whole world. General Miller, the Californian Senator has proved himself a most valuable friend to us in recent congressional discussions. Furthermore, we are happy to be assured that the present Administration at Wash-

ington is animated by a most friendly spirit

to this Government, and that its policy to-

ward us is in decided contrast with the

initiative inspired by the late Secretary

Blaine. Thus we have the Executive and

the Senate standing as our protectors

against the more aggressive spirit of a sec-

tion of the House of Representatives . AFTER a long and spirited debate the Asembly passed the item of \$500,000 for immigration purposes by a vote of 31 to 10. The item was most strenuously opposed by a number of the native members of the House, some of whom, however, after lisother supporters of the vote, withdrew their opposition and supported the passing of the item. This result must be a source of congratulation to all who are engaged in industrial enterprises in this country. The labor question is a pressing one and is recog-nized as such by the Government. Minis-ters have now the satisfaction of finding that in their proposals on the subject they have the support of a very large majority of the House and that the opposition to them reduces itself to a mere handful of disappointed office-seekers, the cause of whose persistent and aerimonious opposition to everything the Government proposes is so plainly to be seen that the influence they

might otherwise exert is lost to them.

The vote for Immigration being passed in committee by so large a majority, we may feel assured that it will also pass the third reading and become law. Ministers may now, therefore, for the first time since they took office, give consideration to the devising of means to make the most profitable use of the money which is to be devoted to the introduction of laborers and new elements of population. In this they enough in all conscience for this litobject.
